PROFESSIONAL SUMMARY

Highly motivated professional eager to take on new challenges, demonstrating a strong work ethic and adaptability in dynamic environments. Excel in independent work, quickly mastering new concepts and processes. Possess exceptional interpersonal skills, fostering collaboration and positive team dynamics to achieve organizational goals.

SKILLS

Languages: Python, Java, JavaScript
Backend: Django, REST API, Web Services
Frontend: HTML, CSS, React (Basic)
Database: MySQL
Tools & Concepts: Git, GitHub, Data Structures & Algorithms (DSA), Problem Solving

PROJECTS

AI-Based CBT (Computer-Based Test) Platform Dec 2025 – Mar 2026
Django | Django REST Framework | React | MySQL | OpenAI API | Repo: github.com/Monalisa-15/AI-Based-CBT-Platform

- Built a full-stack AI-driven test platform that automatically generates MCQs from uploaded PDF and Word study materials using the OpenAI API.
- Developed RESTful APIs with Django REST Framework covering JWT authentication, role-based access (teacher/student), test and question management, submissions, automated scoring and a leaderboard.
- Implemented timed test execution with automated MCQ evaluation and result calculation.
- Designed relational database models in MySQL using Django ORM and optimized data management for tests, questions and submissions.
- Created teacher and student workflows for test creation, AI-generated question review, exam participation, performance tracking and result management.

EXPERIENCE

Software Development Intern – KodNest Technologies, Bengaluru, India Jan 2026 – Present

- Developed Python programs and managed MySQL databases while supporting project teams in implementing software solutions.
- Worked with frontend technologies and contributed to building user-facing features under professional guidance.
- Performed manual testing to verify functionality and maintain software quality.

Web Development Intern – Averixis Solution, Remote Jun 2025 – Sep 2025

- Completed an intensive technical training program focusing on backend web architecture and Python programming.
- Practiced writing object-oriented Python scripts and structured SQL queries for server-side logic management.
- Mastered foundational web protocols, framework workflows (Django/Flask concepts), and version control via Git.

EDUCATION

Master of Computer Applications (MCA) – Biju Patnaik University of Technology, Odisha | CGPA: 8.39/10 2024 – 2026
B.Sc in Computer Science – Fakir Mohan University, Odisha | CGPA: 8.3/10 2021 – 2024
Class XII – Talanagar H S School, Odisha | 86% 2020 – 2021
Class X – Umamani Uchha Bidyapitha, Mahamadabad | 82.83% 2018 – 2019

CERTIFICATIONS

- Python Fundamentals & Data Structures – Coursera
